

InTeLyze®

INTERACTIVE TECHNICAL ANALYSIS

The movement of capital in the financial market has led to a high volatility in the security prices. The result of changes in the market, in combination with an increasing number of traders who want to manage their capital themselves, makes it easy for everyone to realize the value of education.

InTeLyze® is not created to prove whether or not technical analysis of securities is “abracadabra”. InTeLyze® is based on the fact that a big group of actors in the financial market uses technical analysis. This group action is a good reason for learning technical analysis. And isn’t this class action of the financial market and the collective psychology the basis for technical analysis?

The question is not about whether we should use technical analysis or fundamental analysis. The question is “***can we afford not knowing technical analysis?***”

○ What Is InTeLyze?

Knowledge is the most important factor to succeed and get results in all businesses. This is also a fact regarding trading with securities. Knowledge will give us a better possibility to prevent losses and increase the profit.

InTeLyze® is THE ONE AND ONLY interactive education for technical analysis in the world. No other education in the subject has ever offered the Class and Degree of InTeLyze.

InTeLyze® is a result of several years of development and a complete package of what you need to know for your trading. InTeLyze® combines professional teaching and using technical analysis in harmony with users.

○ Pedagogic

InTeLyze® is divided into three different levels. Users may navigate freely through the categories.

The Education follows the rule of 4 E's: Explanation, Example, Exercise, and Evaluation. Each section in the education is explained in an easy and understandable way.

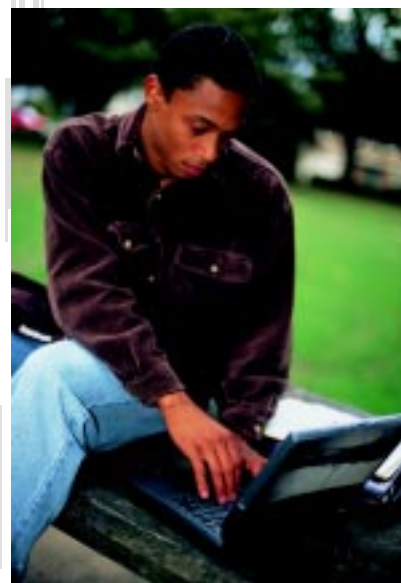

The interactivity in InTeLyze® has created a great exemplification through the whole education. By following each section, with examples and test questions, users may evaluate their knowledge immediately.

○ E-Course

E-Course is an online version of InTeLyze® created to bring the knowledge of Technical Analysis directly to your computer.

This service enables you to have exclusive access to the world's most complete interactive information and education in technical analysis of stocks and other securities 24 hours a day.

With E-Course, you do not need to take time away from the markets and your clients. The instant and interactive features of E-Course will give you the best service and adequate information about the analysis you need at any time.

Interactive Tutorial

Every trader needs a reference when it comes to technical analysis of securities and using many different indicators together with patterns and various interpretations.

A “search” function has made InTeLyze® an effective interactive handbook for everyone who trades with stocks and other securities.

During the stressed minutes of the trading day, this function will help the user to refresh his knowledge before making any decisions.

Independent Features

Being independent is a powerful feature in any education. Independency makes the education universal and the student will have a feeling that what they learn is worth learning.

Educating in technical analysis makes it even more important. No specific securities are mentioned by name in InTeLyze®. The reason is we do not want the student to think about a specific security. We focus concentration on the learning and not one particular security.

For example, InTeLyze® wants to teach that Moving Averages can be used with all kinds of securities, no matter if we are analyzing Dow Industrial Index or American Online. In addition, InTeLyze® is not connected to any technical analysis software. This means that all technical analysis software in the market can be used together with InTeLyze®. Technical analysis software *analyzes*, and InTeLyze® teaches how to *interpret analysis*.

Fast Learning

InTeLyze® increases the learning-speed incredibly. InTeLyze® uses your full concentration during the learning process by activating more senses than any other educational material. This feature in combination with your freedom to learn when it fits best, offers you the best result.

Contents in InTeLyze

Who Should Use InTeLyze?

InTeLyze is for everyone trading with stocks, futures, options and other securities, regardless of the amount invested.

As a professional trader, InTeLyze can be your best tutorial and encyclopedia in technical analysis. It is a comprehensive handbook that keeps your knowledge refreshed and updated.

As a private investor, you may already know the value of technical analysis. InTeLyze will offer you the knowledge you need better than any other material in the market.

As a company, you can use InTeLyze to give your personnel or clients an education they will never forget. InTeLyze is the world's only interactive program that can offer the most complete and professional education in technical analysis of securities for novices, experts and everyone in-between.

Language

Some traders find technical analysis complicated. By analyzing the language used in InTeLyze®, we have created an education understandable for everyone who knows approximately 2000 words in English, without making the language easy, childish or unprofessional.

This feature makes InTeLyze® the only Interactive Education ever created according to these principals.

Tailored Features for Your Organization

To meet the needs of our clients, InTeLyze has been produced so that we can tailor it to YOUR organization and requests. The screen layout and the web interface can also be tailored in accordance with your needs and your company's image.

Modules

Simply tell us what you need. We build it for you.

InTeLyze follows our general rule of service. We give you what you need. Therefore InTeLyze can be offered as modules. We simply tailor the education you need. We put value in your portfolio.
